

A Mendo Makers event

A Virtual Mendo Makerspace presentation on
Wolfram Technology

by: Stewart Dickson, Real-Time Data Feeds for
Wolfram|Alpha

Where: Fort Bragg Library

When: Tuesday, April 30 6:00 to 7:30 PM

Please join Mendo Makers for a general overview of Wolfram Technology. What started as the Mathematica System for Doing Mathematics by Computer in 1985 has grown into an integrated suite of computational knowledge tools on-line. Stewart Dickson, who has had a relationship with Wolfram Research since 1989 will guide you through the myriad (and fun!) ways in which you can try out Wolfram Computational Knowledge without buying Mathematica! The presentation will show you some of the behind-the-scenes ways in which data from your electronic neighborhood winds up in Wolfram|Alpha. Stewart will also tell the story of his history with Wolfram Research, which nearly spans the entire history of the company itself.
