

Hi All,

Guess what I found on the shelves in the back room at Sew n Sew—more texture quilt kits! I made the pictured one here using one of them and the pieces were already cut into squares! Easy...

The instructions in some of the kits are how to make a “Touch Muff”. but you can still just make a touch quilt.

The instructions for “Touch Quilts” are helpful but just make any size that would fit comfortably on a seated person’s lap. 24 x 24 is the size of the quilt pictured here. There is even a label included in many of the kits.

Finished texture quilts can be put in the box labeled Donation Quilts in back of Sew n Sew or bring it to the regular meeting to show first! Just think of all the people we will make happy by giving them one of these little quilts.

Thank you all so much,

Grace V.
