THERE WAS NO REPORT SENT OUT FROM RI, I SUSPECT DUE TO THE HOLIDAY PERIOD THAT WE ARE STILL IN. HOWEVER, I WAS ABLE TO ASCERTAIN THAT ONCE AGAIN, ANOTHER WEEK OF GOOD NEWS TO REPORT. THERE WERE ZERO WILD POLIO CASES REPORTED...THE TWELFTH WEEK IN A ROW, OR PUT ANOTHER WAY...3 MONTHS OF NO WILD POLIO CASES THE WILD COUNT OF 39 REMAINS THE SAME, 9 IN AFGHANISTAN AND 30 IN PAKISTAN (compared with 89 for the same period in 2024). THERE WERE ALSO 5 WILD POSITIVE ENVIRONMENTAL SAMPLES COLLECTED.

Dates of the most recent wild poliovirus cases:

Afghanistan: 10/3/25 Pakistan: 09/19/25

Circulating Variant Polio Virus

In our other battlefield against polio, the circulating Variant Poliovirus (cVDPV), there was 1 new case reported last week, as follows:

- Chad: 1 Type 2 case (26 cases YTD compared to 39 cases in 2024).

Positive Environmental Samples (ES)

- **Wild** - As mentioned above there were 5 Positive Environmental Samples which increases so the Y-T-D total to 683 compared to 773 total last year.
- **Variant** - There were 1 positive ES of the cVDP2, variant collected in Algeria, so the total increases to 226. compared to 292 in 2024.

I hope you are all having a wonderful holiday season that is upon us now.

With what I'm sure is a Holiday Schedule at RI Headquarters in Evanston, we did not get the latest numbers to forward to you. However, we will update when able.

Happy New Year Everyone 😊
